High resistance to UV

One component

Resistant to pool chemicals.

High resistance to UV

Excellent chemical and water resistance.

Description

High quality, one-component solvent-based paint, ideal for pools and non-potable water tanks. Provides excellent resistance to chemicals and water. It is also used for surfaces that require special resistance to humidity, weak acids and other chemical solutions (other than strong acids).

Purpose of Use

For professional use on interior or exterior concrete pools, fountains and various water tanks.

Product Characteristics

- One-component pool paint.
- Very good adhesion.
- High performance and coverage
- High resistance to humidity.
- High chemical resistance.

Performance

4 - 6m²/lt, on non-porous surfaces.
