*Color has a Name!*

Matt, water-based primer based on acrylic resins for multiple uses. Suitable for interior and exterior use, offers great adhesion on non-absorbent surfaces (as galvanized iron, aluminum, glass, tiles etc.) as well as great penetration on absorbent surfaces (as plaster, lime, concrete, gypsum etc.) Due to its special composition, it isolates and covers difficult stains, such as smoke, nicotine, mold, coffee s and marker stains, while preventing showing up again. It also prevents the salt transfer on the topcoat. Available in white and thousands of shades through Berling Coloring System.

Surfaces should be smooth, clean, dry and free from grease, dust, loose or flaking paint. The product should be stirred well before use.

Enhances the durability of the final color.  
High performance.  
Very good adhesion.  
Very low in Volatile Organic Compounds.
