

DUCO

Gloss anticorrosive enamel

11.2023 V.02

Excellent quality, gloss, non-yellowing anticorrosive enamel, suitable for both interior and exterior use, for painting all metallic surfaces like rails, doors, etc. It has high coverage and opacity and also great resistance against the weather changes. For better hardness and resistance, the addition of Berling's Hardener at a rate of 14% is suggested, depending on application method.

Stir well before use

Coverage:
12-14 m²/lt

Drying time:
Touch dry from 4 to 6 hours

Thinning
with white spirit at a percentage of 12% v/v

Paint:
Roller

Paint:
Brush

Product Characteristics

- High gloss.
- Very good adhesion.
- High opacity and coverage.
- Great resistance against weather conditions.
- Free of ammonia, lead, mercury and other heavy metals.
- Harmonized with directive 004/42/EC.

Shades

it is available in white, black and in 16 ready colors based on the Duco's colourcard as well as in two bases, A and C for the achievement of hundreds of shades according to Berling's tinting system.

Packaging:

0.200lt
0.375lt
0.75lt
2,5lt

The above information is based on laboratory audits and the long experience of the scientific staff of the company. The quality of the product is guaranteed by the company's operating system which is based on the requirements of ISO 9001, ISO 45001, ISO 14001 and the EMAS regulation. As producers we are not responsible for any damage or damage caused in the event that the product has not been used for the appropriate application and in accordance with its instructions for use.

Recommended application systems

Interior/Exterior surfaces

- **New/Old surfaces**

Surface Preparation

Surfaces to be painted must be dry and clean without rust, grease, etc. The product is applied by brush or roller after being suitably thinned on a well-prepared surface. Apply at temperatures between 10° C and 35° C and up to 70% in humidity.

Application Instructions

New Surfaces

Prime new surfaces with Berling's anticorrosive primer Duty or Red Lead Primer. Apply two coatings of the primer and then apply two coatings of Duco with a time interval of 24 hours between them.

Old Surfaces

Clean surfaces from old and peeled paints using sandpaper. Then, apply two coatings of Duco with a time interval of 24 hours between them, if permitted by the weather conditions. For better hardness and resistance, the addition of Berling's Hardener at a rate of 14% is suggested, depending on the application method (without adding any extra solvent). After use, clean tools with White Spirit. Manage eluants as hazardous waste in accordance with the valid legislation and the local regulation.
