

METAL PLUS PRIMER

Anti rust metal primer

09.2023 V.02

High quality alkyd primer, suitable for all metallic surfaces and automotive chassis. High anti corrosion protection, resistance to weather variations, resistance to impact and to moisture. High adhesion, opaqueness, coverage with ease application. Provides a perfect surface for recoating with any enamel, solvent, or waterborne irregularities. It is easily rubbed when it is dry.

Stir well before use

Coverage:
12-14 m²/lt

Drying time:
Between 1 to 2 hrs

Thinning:
with White Spirit
up to 15% by volume.

Application:
Roller

Application:
Brush

Application:
Spray gun

Product Characteristics

- Antirust protection.
- Ease of application.
- Very good grip.
- High performance and coverage.
- Great resistance to changes in weather conditions.

Packaging:

0.375lt
0.75lt
2.5lt
5lt
10lt

Shades

Available in white, grey, tile red and black

The above information is based on laboratory audits and the long experience of the scientific staff of the company. The quality of the product is guaranteed by the company's operating system which is based on the requirements of ISO 9001, ISO 45001, ISO 14001 and the EMAS regulation. As producers we are not responsible for any damage or damage caused in the event that the product has not been used for the appropriate application and in accordance with its instructions for use.

Technical Specifications

V.O.C	495 gr/lit (Maximum Volatile Organic Compounds content ready for use).
Density	1,4-1,7 gr/cm ³ (ISO 2811).
Viscosity	110-120 K.U., 25°C (ASTM D562).
Performance	12-14m ² /lit, for one coat
Thinning	Thin with White Spirit up to 15% by volume.
Application	The product is applied with roller, brush or spray gun.
Drying	Touch dry in 1-2 hours depending on the weather conditions. (The drying time might be elongated according to temperature and humidity conditions)
Recoating	Repaint after 16 hrs, depending on weather conditions. (The drying time might be elongated according to temperature and humidity conditions)

Recommended application systems

Interior/ Exterior walls

- New surfaces / Old- Already painted surfaces

Preparation

The surfaces to be painted must be dry and clean. Apply the product by brush or roller after proper dilution. The application is carried out at an ambient temperature of 10°C to 35°C and a maximum relative humidity of 80%. Particular attention must be paid to covering corners and holes and in general all difficult spots of the surface to be painted in order to avoid the penetration of moisture under the paint film.

Primer

For new surfaces: Apply 2 coats by brush or roller and in 2 coats 16 hours apart if weather conditions permit. On vertical and difficult surfaces, it is recommended to apply more thin layers to achieve an excellent aesthetic result.

For old surfaces: Already painted surfaces must be cleaned and any old and peeling paint removed using sandpaper. Then 2 - 3 coats of Metal plus primer are applied to the surface with a time difference of 16 hours if the weather conditions allow it. On vertical and difficult surfaces, it is recommended to apply more thin layers to achieve an excellent aesthetic result.

METAL PLUS PRIMER

2 or 3 coats

Final coating

Apply 2 coats of Berling Solvent or Water Based Enamel products according to their application instructions.

SOLVENT ENAMEL: DUCO PLUS PU or DUCO or ANTIRUST LAC or BERLING LAC SATIN

WATER BASED ENAMEL: NATURE AQUALUX or ALL IN ONE or NATURE PERGOLA OPAQUE

2 coats
